

Selected pathways: effect direction and original FDR

	OIPN		NC		CCI	
Response to wounding	*		*		*	
Cytokine-mediated signaling	*		*	*	*	
Leukocyte migration	*		*		*	
Phagocytosis	*		*	*	*	
Signaling in response to DNA damage	*		*	*	*	
Tissue remodeling	*		*		*	
Oxidative phosphorylation	*		*	*	*	
Tricarboxylic acid cycle	*		*	*	*	
Regulation of trans-synaptic signaling	*		*		*	
Potassium ion transport	*		*	*	*	
Sterol biosynthesis	*		*	*	*	
Collagen fibril organization	*					
Extracellular matrix assembly	*					
WNT signaling	*					
Tight junction organization	*			*		
Schwann cell differentiation	*					
Peripheral nervous system axon ensheathment	*		*	*		
Renal system development (GO annotation)	*					
Exocytosis	*					
Cellular response to unfolded protein	*					
	GSEA	GSVA	GSEA	GSVA	GSEA	GSVA

Red: positive; blue: negative. * Original within-study FDR <0.05. Colors show direction only.
